

Day 34: Final Polish & Build

OBJECTIVE:

Apply final polish, optimize, and create exportable build

WARM-UP:

- What feedback most improved your game?

DIRECT INSTRUCTION:

Final checklist: no debug logs, all scenes in build settings, quality settings; WebGL or standalone build; Test build vs editor; Handle edge cases

- Final polish checklist provided
- Remove all Debug.Log statements
- Add all scenes to Build Settings
- Set resolution and quality
- WebGL build considerations
- Build & Run tests the export
- Testing in build catches issues
- Prepare game description

GUIDED PRACTICE:

- Go through final checklist together
- Remove debug logs
- Add loading screen
- Ensure all scenes connected
- Test build on each platform

INDEPENDENT PRACTICE:

- Create final build
- Test completely start to finish
- Fix build-specific bugs
- Write 3-sentence game description
- Prepare for presentation

CLOSURE / EXIT TICKET:

- Most important thing you learned?
- What would you do differently?
- Are you proud of your game?
